

V-Lap Processing Line Model 250H-100S

Dominion Group are pleased to bring to the market a 2021 V-Lap Processing Line, Model 250H-100S producing a non-woven material currently using synthetic staple fibre.

The complete line is in as-new condition with an estimate of 100 hours and has been setup, commissioned and run for a small batch only. These machines are utilised in the recycling industry to take either recycled synthetic staple fibre and or cotton shoddy fibre to manufacture various items. The line can produce acoustic materials for industry, filter media, foam replacement for furniture and bedding industries and waddings for clothing and pillows etc.

The complete line consists of the following items:

3 of 1.5mt Bale Hoppers, 1.5mt tri roller hopper, 1.5mt pre opener and fibre conveyor, 1.5mt main opener, 2mt x 3mt x 6mt mixing bin, 2.35mt card hopper and volumetric, 2.5mt weighing conveyor system, 2.5mt double doffer card + dust separator, 2.5mt V-Lap and card edge suction and dust bags, 2.5mt x V-Lap system, 2.5mt 3 zone bonding oven with compression and cooling zone, 2.5mt V-Lap splitter and roll up, electrical control cabinets, 2 touchscreens, 1.2mt edge trim recycle unit and feed tower, numerous spares and compressor unit.

To the Order of Craig Shepard and Lara Wiggins of KordaMentha as Receivers and Managers of certain assets of Australian Recycling Taskforce Pty Ltd (ACN 638 010 394) as trustee for the Australian Recycling Taskforce Unit Trust (Receivers and Managers Appointed)
